Model	Registration No. (Use this number on future correspondence)
CTA0840BBxxP5-04Cyyy	3412

Dear Marissa

This letter is to confirm that the above referenced water treatment device model is now registered with California State Water Resources Control Board (SWRCB) and have been included on the SWRCB 2018 Registration listing. This listing is available at https://www.waterboards.ca.gov/drinking_water/certlic/device/watertreatmentdevices.html

This registration is valid through calendar year 2018. Under this registration, you have the following responsibilities:

1. Annual renewal of the registration for the next calendar year. We will send a renewal notice in the first quarter of each year.
2. Providing SWRCB with an updated Product Data Sheet (PDS) if there are any contaminant reduction claims that are dropped or other significant changes in the PDS.
3. Informing SWRCB immediately if your certification by an ANSI-accredited certification organization is suspended, lapses or is no longer valid.
4. Informing SWRCB immediately if there are any changes on the primary contact person's information representing your company.

The registration must be renewed annually and meet the requirements applicable at that time. We intend to send renewal notices in the first quarter of each year, however it is the

responsibility of the manufacturers or their representative to ensure that the registration remains current.

Please contact at WB-DWP-WTDevices <WTDevices@waterboards.ca.gov> with any questions.

Sincerely,

Mark J. Bartson, P.E., Chief
Technical Operations Section
Supervising Engineer
