### ENPRESS LLC – NEW ENPRESS HYBRID Cartridge Tank® System for E3 Series and New 20-micron Chloramine filter

EASTLAKE, Ohio – ENPRESS LLC, is pleased to announce the update of its industry leading Cartridge Tank® with its new **HYBRID Cartridge Tank®** design, featuring a modified bottom connection design that allows for direct connection to the vessel and system. Utilizing ENPRESS vessel manufacturing and design know-how, the NEW **Hybrid Cartridge Tank®** uses an industry standard 2 ½" inlet opening of which standard In/Out heads and ENPRESS plumbing connections now connect directly to the bottom of the vessel, eliminating the large opening bottom cap original design.

Additionally, ENPRESS has expanded its product offering of its Made in the USA produced carbon blocks from its **essee llc** division, with a new **20-micron chloramine carbon block** that is made using high performance coconut shell carbon, of which delivers superior adsorption capacity. The new carbon block will treat 50,000+ gallons @7gpm with 3ppm chloramine and a greater than 85% reduction. All components and materials are manufactured from NSF/ANSI 61 certified raw materials.

"The new Hybrid CT design will simplify product installation in the field, making the Cartridge Tank® even easier to install with no tools required, and with the new 20-micron chloramine carbon block, we have a new filter that will more easily flow and address chloramines in POE filtration installations around the globe," said Doug Wild, Territory Sales Manager at ENPRESS LLC.

The ENPRESS **Cartridge Tank®** is specifically designed for Residential, Light Commercial, and Commercial Point-of-Entry (POE) installations and applications. The patented and patent pending ENPRESS Cartridge Tank® filtration systems and filters feature a state-of-the-art snap-ring technology to eliminate the need for cumbersome tools and makes the removal and change-out of filters simple and easy, so Homeowners and Installers can easily replace the filter in their system by following a few simple steps and having certified cartridges to exceed the target contaminant removal. These innovative POE (Point-of-Entry) filtration systems provide **FILTRATION EVERYWHERE TECHNOLOGY®**.

#### **ONE - Water Filtration Simplified®**

ENPRESS LLC is a worldwide leading manufacturer of composite pressure vessels and filtration systems for use in water treatment. The exclusive and patented products designed by ENPRESS provide superior performance, filtration, and water saving solutions...100% Made in the USA. More information is available on the company's website at [www.enpress.com](http://www.enpress.com) or [www.enpressgroup.com](http://www.enpressgroup.com). US and International Patents and Patents Pending.
